EDUCATION

MICHIGAN STATE UNIVERSITY CODING BOOTCAMP – 2022–PRESENT

Currently enrolled in Michigan State University's 6-month coding bootcamp for Full-Stack Web Development.

EMT PARAMEDIC COURSE – 2020-2021

Received Paramedic certification from Dorsey Emergency Medical Collage.

BACHELOR'S OF SCIENCE IN BIOLOGY – 2014-2018

Received a degree in Biology with a minor in Chemistry from Saginaw Valley State University. During my studies, I took a particular interest in the fields of genetics, microbiology, organic chemistry, and biochemistry. Laboratory experiences within the fields of genetics, microbiology, and organic chemistry were received during the pursuit of my degree as well.

EMT BASIC COURSE – 2014-2015

Received EMT Basic certification from Delta Community College.

FIREFIGHTER I AND II COURSE – 2013-2014

Received Firefighter I and II certification while attending Bay City All Saints High School through a cadet program offered by Bay County Fire Academy.

WORK EXPERIENCE

PARAMEDIC, DETROIT FIRE DEPARTMENT; DETROIT, MI – 2022-PRESENT

As a Paramedic for the Detroit Fire Department, I provide advanced life support in an emergency response system to multiple types of medical and trauma related emergencies. Procedures include endotracheal intubations, IV placement, Advanced Cardiac Life Support, transcutaneous pacing, and much more.

EMT BASIC, DETROIT FIRE DEPARTMENT; DETROIT, MI – 2018-2022

As an EMT-B for the Detroit Fire Department, my main role is to provide basic life support in an emergency response system to multiple types of medical and trauma related emergencies. I perform emergent patient assessments, transmit 12-lead EKGs to receiving hospitals, determine course of treatment for the patient, establish medical incident command, and administer basic medications that the patient may require within my protocol.

EMT BASIC, MOBILE MEDICAL RESPONSE; SAGINAW, MI – 2015-2018

As an EMT-B, I provided transportation and administered basic life-support interventions during both emergent and non-emergent (inter-facility transfer) calls. I performed patient assessments, assessed vital signs, and administered basic medications when needed

VOLUNTEER EXPERIENCE

CHILDREN'S MIRACLE NETWORK – 2014-2015

The Children's Miracle Network's benefit dinner is an annual dinner put on by Phi Delta Epsilon for a family with a child battling cancer. A child is sponsored by the organization and money is raised through volunteer efforts throughout the year to assist with medical expenses the family currently faces. A custom care package for the child is also put together with their favorite things (toys, foods, and movies). Along with the dinner, the organization also plans activities for the child to take part in, one such being a visit and tour the Saginaw Township Fire Department.

ZOO BOO – 2014-2015

During this experience I volunteered at the Saginaw Children's Zoo during the weekend approaching Halloween. This included handing out candy to children at the zoo, painting faces, and monitoring other activities put on by the zoo for the children. I also assisted in clean-up of the park, and with making decorations for the park.

RELAY FOR LIFE – 2014-2018

The Relay for Life is a global fundraiser event put on for the American Cancer Center, as well as other cancer organizations. Saginaw Valley State University is one of many universities and that hosts this event, and encourages all of its student organizations to participate in. During my college career, I participated every year and assisted both my pre-medical organization (Phi-Tau-Epsilon), as well as my social organization (Sigma-Pi) with their fundraisers.

EXTRACURRICULAR EXPERIENCE

PHI-TAU-EPSILON – 2014-2018

Phi Delta Epsilon is a professional fraternity for pre-medical students. This group gave me the opportunity to both learn from older students, and help younger students with classes I had already taken. The group also gave me access to volunteering opportunities in order to fundraise for the Children's

Miracle Network Benefit Dinner. The group put me at an advantage for many of my classes, and gave me many opportunities to expose myself to medicine.

SIGMA-PI – 2014-2018

My experience as a Sigma Pi gave me the opportunity to be placed in leadership roles, as well as volunteer within the community through events such as the Zoo Boo. Being a part of the fraternity also assisted in my schooling, as every member has required study hours that must be fulfilled within the library.

CERTIFICATIONS

- State of Michigan EMT-B License
- State of Michigan Paramedic License
- AHA BLS CPR Certification
- AHA ACLS Certification
- Firefighter I and II Certification
- HazMat Operations Certification
